

HTAsiaLink

STRATEGIC PLAN

2025 - 2030

FOREWORD

Dear Friends

I am delighted to share with you our Strategic Plan for 2025 - 2030 for HTAsiaLink. This document embodies our shared vision for the future of Health Technology Assessment (HTA) in the Asia-Pacific region.

From our humble beginnings in 2011 with just three organisations, we have blossomed into a dynamic network of over 50 members across 20 settings. Our journey has been one of collaboration, shared learning, and unwavering commitment to evidence-informed health decision-making. This plan builds on our successes and charts an ambitious and exciting roadmap for the next five years.

We have identified five key strategic goals:

These goals reflect our dedication not only to developing our members' expertise but also to broadening our influence in the healthcare landscape.

As we embark on this exciting new chapter, I invite each of you to engage actively with this plan. Whether you are leading initiatives, sharing insights, or contributing to projects, your involvement is vital to our success. Let us work hand in hand to bolster our capabilities, drive innovation in HTA, and ensure our work continues to shape healthcare policies across our region.

The road ahead is full of promise. I am confident that with your passion and our collaborative spirit, we will achieve remarkable things in the coming years. Together, we can make a lasting difference in healthcare systems and improve lives across Asia-Pacific.

Sincerely,

Benjamin Ong
HTAsiaLink President 2023-25

ABOUT US

HTAsiaLink is a network of non-profit organisations dedicated to advancing health, founded in 2011 by Taiwan's Centre for Drug Evaluation, Thailand's Health Intervention and Technology Assessment Program Foundation, and South Korea's National Evidence-based Healthcare Collaborating Agency, with support from Universiti Sains Malaysia and the China National Health Development Research Center. The network has since expanded to include over 50 organisations from 20 countries and settings¹.

While aligning with global HTA efforts, HTAsiaLink focuses on the unique needs of its members to advance evidence-informed health decision-making. Through its collaborative and voluntary model, the network focuses on member engagement in research, knowledge sharing, capacity-building, organising an annual conference and other academic initiatives. The annual conference serves as a pivotal platform for networking, sharing research, fostering collaborations, and supporting professional development.

As a non-profit network that operates on a voluntary basis, HTAsiaLink remains accessible to a wide range of organisations and professionals, fostering inclusivity and collaboration. The network is committed to offer an accessible and supportive platform for academic, governmental, and non-commercial entities to engage in knowledge exchange and regional HTA capacity building. Through these collective efforts, HTAsiaLink continues to play a vital role in advancing HTA and improving health systems across the Asia-Pacific region.

VISION

To **BE A HUB** for advancing
the Health Technology Assessment (HTA)
ecosystem across the Asia-Pacific region.

MISSION

To strengthen individual and institutional capacity in HTA research and evidence integration into policy.

To enhance organisational efficiency through collaborative activities.

To facilitate the sharing of HTA knowledge across Asia-Pacific and beyond.

STRATEGIC GOALS

Grow and Strengthen HTA Capacity Among Members

Cultivate professionals in HTA in Asia Pacific through tailored and accessible learning opportunities. Equip them with skills, knowledge, and capabilities to make meaningful contributions to institutional HTA processes and advance HTA at subnational, national, and regional levels.

Serve as a Regional Knowledge Hub

Leverage HTAsiaLink’s communication channels, both online and offline platforms, to streamline knowledge sharing, optimise information dissemination, and drive engagement with members and a broad range of non-member stakeholder groups such as policymakers, academics, and other non-profit international organisations.

Expand and Strengthen Collaboration

Enhance value to members through opportunities for active participation and collaboration, while expanding outreach to non-members, including public organisations in both existing and new members, as well as fostering strategic partnerships with international organisations and networks beyond the region.

Promote HTA Utilisation

Increase awareness of HTA’s value in informing decision-making by engaging with a wider range of global and national key opinion leaders and other non-member stakeholders.

Foster Sustainable Network Growth

Diversify resources, optimise financial management, and foster leadership within the network.

PATH FORWARD: KEY ACTIONS

These activities will be encouraged for all members to host and participate in, with support from the Board members, Secretariat, and Editorial team, where applicable. The Board will provide guidance, resources, and assistance to ensure the successful organisation and participation in these events, while the Secretariat will facilitate coordination and communication to maximise engagement. The Editorial team will lead on the communication strategy, including but not limited to the website.

Together, the Board, Secretariat, and Editorial team will work to create an inclusive environment that motivates all members to get involved, share their expertise, and contribute to the success of the network.

1

Strengthen and Advance Capacity Development Initiatives

1.1 Maintain Core Activities:

Sustain flagship programmes yearly such as the annual HTAsiaLink conference, workshops, and webinars, offering a balanced mix of fundamental HTA concepts and advanced methodologies designed to address the diverse needs of members, ensuring accessibility and relevance for members at all levels of HTA development. To recommend Council members to nominate topics and activities for upcoming year, or academic institutions to form working groups to identify areas of mutual interests and collaborations.

1.2 Conduct Regular Landscape Analyses of HTA Needs:

Identify and address knowledge gaps of members by conducting annual survey analysis. Broader landscape analyses of the current situation including health priorities, accessibility barriers, gaps, and the need for HTA infrastructure development in different countries to be conducted every two years. Use these analyses for strategic planning to design programmes targeted diverse professional backgrounds, creating meaningful and effective learning opportunities that strengthen the network's overall capacity.

1.3 Broaden Learning Opportunities:

Empower members and Memoranda of Understanding (MoU) partners to introduce and implement innovative formats such as modular courses, structured mentorship and internships to equip members with the skills needed to navigate emerging health technologies and policy challenges.

2

Improve Communication and Knowledge Exchange

2.1

Develop Engaging Communication Strategies:

Ensure consistent interactions with members. Develop and maintain accessible digital platforms that centralise resources, disseminate information, and enable members to contribute actively to the network's activities. Revitalise the website with features such as activity outputs, updated regional resources, and a discussion forum, prioritising improved navigation and accessibility for enhanced member engagement. Launch targeted content to engage younger members, broaden visibility, and highlight the network's activities and achievements through dynamic formats. Showcase the outputs and outcomes of network activities such as conference proceedings, meeting summaries, and existing knowledge products.

2.2

Expand Knowledge Sharing Platforms:

Establish a registry by 2025 to aggregate upcoming, ongoing, and completed HTA studies conducted by members as a region-wide knowledge sharing platform to identify both common and distinctive areas of research to facilitate research collaboration and reduce duplications.

2.3

Explore and Strengthen Partnerships:

Strengthen current and explore new partnerships through formal collaborations such as MoU, particularly non-for-profit organisations and networks to facilitate cross-regional exchange of expertise. These partnerships will serve as channels for sharing innovative practices, advancing HTA methodologies, and enabling the network to access global resources and insights.

3

Expand and Sustain the Network

3.1 Expand and Maintain Membership and Regional Representation:

Implement targeted recruitment strategies to attract to all professional levels from emerging HTA contexts, focusing on underrepresented countries and nascent HTA organisations. Provide access to network resources, expertise, and mentorship to drive HTA growth across the region. Raise awareness of membership benefits and ensure a seamless onboarding experience for new members. Ensure inclusiveness and strengthen regional representation. For example, Council members to identify potential members in their countries and strategies to engage them at the regional level.

3.2 Develop Standardised Reporting and Guidelines:

Establish clear and consistent reporting standards and guidelines for network activities to ensure consistent quality and efficiency and ensure documentation of institutional memory.

3.3 Empower Leadership:

Cultivate a sense of inclusivity and professional belonging by providing members with opportunities to contribute to decision-making and leadership within the network. Encourage volunteer participation to facilitate a wider range of network events and activities beyond the annual conference. For example, an annual solicitation of topics for consideration via a survey to all network members can ensure their input is reflected in decision-making processes, fostering engagement and shared ownership of the network's direction.

3

Expand and Sustain the Network

3.4 Foster Leadership Development:

To identify and cultivate future leaders among members to support emerging leaders and foster a culture of volunteerism and inclusivity.

3.5 Promote Member Ownership and Inclusivity:

Empower network members and foster a sense of ownership and engagement through their involvement in the network's activities. For example, network members providing input when requested.

3.6 Diversify Funding Sources:

Support key initiatives and members by seeking grants from national, international, and global public organisations through joint projects and partnerships.

3.7 Explore Financial Models for the Network Activities:

Identify financial management systems to support activities for transparency and effective resource allocation, with regular evaluations and adjustments to optimise funding strategies and secure long-term financial stability if the funding is managed by the network.

4

Increase HTA Impact

4.1 Monitor and Evaluate the Network's Impact:

Maintain records of activities, outputs (e.g. guidelines, publications, reports, etc.), and outcomes (e.g. level of engagement, the use of outputs, etc.) of the network, and conduct evaluations as deemed necessary.

**4.2 Increase External Engagement:**

Organise platforms and activities to engage with evidence users, such as decision makers, and other non-member stakeholders to ensure alignment with their interests. Coordinate targeted pre-conference sessions and trainings, as well as share resources and collaborate through digital platforms.

**4.3 Increase Visibility Outside the Network:**

Increase HTAsiaLink's visibility and impact by actively participating in external activities and events to engage with broader health policy and HTA communities.

IMPACT MEASURES

In this section, we outline how we can measure the key actions and activities, including the responsible team involved and how they link to the strategic goals and the timeline over the 5-year period. More specific details can be further added to the table below.

Activity	Indicator	Responsible team	Means of verification	Baseline	Output/Target	Strategic Goals					Timeline (Year)					Outcome	
						 1	 2	 3	 4	 5	2025-2026	2026-2027	2027-2028	2028-2029	2029-2030		
1. Strengthen and Advance Capacity Development Initiatives																	
1.1 Maintain Core Activities: Sustain flagship programmes yearly such as the annual HTAsiaLink Conference, workshops, and webinars	1) Number of HTAsiaLink-hosted events, training programmes, and programmatic activities	Secretariat	Review official calendars and schedules for events and activities maintained by Secretariat.	HTAsiaLink hosted events from the most recent events (e.g., conference attendance in 2023)	1 conference, at least 1 training programme under HTAsiaLink and at least 1 webinars per year	✓	✓					✓	✓	✓	✓	✓	Increased engagement, particularly among new members and those from underrepresented regions
1.2 Conduct Regular Landscape Analyses of HTA Needs: Identify and address knowledge gaps of members by conducting survey analysis as needed	1) Percentage of member organisations responding to the survey	Secretariat	Survey reports and data summaries, as needed (at least twice in a 5-year period)	Not applicable	At least 1 member from each country to respond to the survey		✓	✓		✓	✓		✓			✓	Improved understanding of regional HTA priorities and challenges among members
	2) Needs and priorities identified for the relevant time frame	Secretariat	Survey reports and data summaries, as needed (at least twice in a 5-year period)	Not applicable	Report summarising HTA needs and knowledge gaps		✓	✓		✓	✓		✓			✓	Improved understanding of regional HTA priorities and challenges among members
1.3 Broaden Learning Opportunities: Introduce and implement innovative formats such as modular courses, structured mentorship and internships	1) Number of new HTAsiaLink hosted events outside of core activities	Secretariat and organising team	Review official calendars and schedules for events and activities maintained by Secretariat	Existing formats primarily include early career researcher programme (ECR)	At least 1 additional activity/event per year	✓	✓		✓				✓	✓	✓	✓	Improved HTA competencies among members, particularly early-career professionals and those in emerging HTA settings

Activity	Indicator	Responsible team	Means of verification	Baseline	Output/Target	Strategic Goals					Timeline (Year)					Outcome
						 1	 2	 3	 4	 5	2025-2026	2026-2027	2027-2028	2028-2029	2029-2030	
2. Improve Communication and Knowledge Exchange																
2.1 Develop Engaging Communication Strategies: Develop and maintain accessible digital platforms that centralise resources, disseminate information, and enable members to contribute actively to the network’s activities; launch targeted content for further engagement; Showcase outputs and outcomes of network activities	1) HTAsiaLink website with engagement features for members	Secretariat and Editorial team	Record of engagement features (website screenshots)	Current version of HTAsiaLink website as of December 2024	Completion of Phase II website for HTAsiaLink members, with an engagement feature		✓	✓	✓		✓					Members are able to stay up to date and receive information more efficiently and maintain professional connection among members
2.2 Expand Knowledge Sharing Platforms: Establish a registry by 2025 to aggregate upcoming, ongoing, and completed HTA studies conducted by members as a region-wide knowledge sharing platform	1) Completion of the registry	Secretariat, registry development team (IT team)	Functional registry with real-time access to aggregated HTA studies	Current status of knowledge sharing within the network (e.g., informal data exchanges, limited access to consolidated resources)	A fully operational and accessible HTA registry by 2025		✓	✓	✓		✓					- Improved regional collaboration through easier access to HTA research. - Reduction in duplicated research efforts by identifying existing studies
	2) Number of HTA studies aggregated in the registry annually	Secretariat, registry development team (IT team)	A list of HTA studies in the registry	Metrics of first year of operation	Comprehensive dataset of member- contributed HTA studies		✓	✓	✓		✓	✓	✓	✓	✓	- Improved regional collaboration through easier access to HTA research. - Reduction in duplicated research efforts by identifying existing studies
	3) User usage	Secretariat, registry development team (IT team)	Metrics (e.g., number of logins, searches, and data downloads)	Metrics of first year of operation	At least 5 additional new users per year		✓	✓	✓		✓	✓	✓	✓	✓	- Improved regional collaboration through easier access to HTA research. - Reduction in duplicated research efforts by identifying existing studies

Activity	Indicator	Responsible team	Means of verification	Baseline	Output/Target	Strategic Goals					Timeline (Year)					Outcome
						1	2	3	4	5	2025-2026	2026-2027	2027-2028	2028-2029	2029-2030	
	4) User experience through survey	Secretariat	Feedback from members through surveys on registry usability and relevance after launch of registry	Metrics of first year of operation	At least 60% of respondents report registry-use to be accessible, satisfactory, and applicable		✓	✓	✓		✓		✓			- Improved regional collaboration through easier access to HTA research. - Reduction in duplicated research efforts by identifying existing studies
2.3 Explore and Strengthen Partnerships: Strengthen current and explore new partnerships through formal collaborations such as MoU	1) Number of joint activities or projects initiated as a result of partnerships	Secretariat	Reports or documentation of joint activities and collaborative projects	2 joint activities with external partners annually as of 2024 (HTAi-HTAsiaLink webinar, guideline development)	At least 2 joint activities with external partners per year		✓	✓	✓		✓	✓	✓	✓	✓	Strengthened regional and international collaboration to support HTA growth
3. Expand and Sustain the Network																
3.1 Expand and Maintain Membership and Regional Representation: Implement targeted recruitment strategies to attract to all professional levels from emerging HTA contexts, focusing on underrepresented countries and nascent HTA organisations. Provide access to network resources, expertise, and mentorship to drive HTA growth across the region. Raise awareness of membership benefits and ensure a seamless onboarding experience for new members. Ensure inclusiveness and strengthen regional representation	1) Annual increase in organisational and associate memberships	Secretariat	Record and review list of memberships	50 organisational and associate members	At least 2 organisational and/or associate members annually	✓				✓	✓	✓	✓	✓	✓	Engaged and growing network with supportive environment, shared ownership, and transparency.
	2) Number of highly engaged members	Secretariat	Conduct annual membership engagement survey to assess participation frequency and event satisfaction	Metrics of first year of operation	Number of members participating in at least 3 network events/ collaborative projects per year			✓		✓	✓	✓	✓	✓	✓	Engaged and growing network with supportive environment, shared ownership, and transparency.

Activity	Indicator	Responsible team	Means of verification	Baseline	Output/Target	Strategic Goals					Timeline (Year)					Outcome
						1	2	3	4	5	2025-2026	2026-2027	2027-2028	2028-2029	2029-2030	
3.2 Develop Standardised Reporting and Guidelines: Establish clear and consistent reporting standards and guidelines for network activities to ensure consistent quality and efficiency and ensure documentation of institutional memory	1) HTAsiaLink website with engagement features for members	Secretariat	Review existing activity materials on the process for hosting network events such as annual conference and webinar	Existing documentation on scoring abstract at conference, Terms of Reference (ToR), and conference proceedings	1 guideline for hosting Annual Conference 1 logo guideline 1 conference summary/proceeding template					✓	✓	✓	✓	✓	✓	Standardised reporting and guidelines for network activities' documentation, which can be easily accessible without the need to re-develop and maintain consistency
3.3 Empower Leadership: Cultivate a sense of inclusivity and professional belonging by providing members with opportunities to contribute to decision-making and leadership within the network. Encourage volunteer participation to facilitate a wider range of network events and activities beyond the annual conference	1) Number of activity proposals led by members	Network members with the support by Secretariat	Annual topic nomination and volunteer survey; Record and track a list of annual activities	Metrics of first year of operation	At least 1 member-led activities per year			✓	✓		✓	✓	✓	✓	✓	Members gain leadership skills to develop initiatives to enhance network and respective organisational capacity in driving HTA-related practices
3.4 Foster Leadership Development: To identify and cultivate future leaders among members to support emerging leaders and foster a culture of volunteerism and inclusivity	1) List of representatives/ leaders who will engage with HTAsiaLink for the duration of the strategic plan	Secretariat with the Board's guidance	Actively reach out to representatives to identify potential members for leadership in the next 3-5 years	Metrics of first year of operation	At least 2 people per country who can represent and engage with HTAsiaLink					✓	✓	✓	✓	✓	✓	Cultivating future leaders among members to enhance and sustain the network's representation and impact at the regional level and beyond
3.5 Promote Member Ownership and Inclusivity: Empower network members and foster a sense of ownership and engagement through their involvement in the	1) Number of members participating in providing feedback and inputs upon request	Secretariat	Record and track the number and frequency of members participating in feedback process	Metrics of first year of operation	At least 40% response rate from members per activity			✓		✓		✓	✓	✓	✓	Strong partnerships and accountability among members in driving diverse network's initiatives

Activity	Indicator	Responsible team	Means of verification	Baseline	Output/Target	Strategic Goals					Timeline (Year)					Outcome
						1	2	3	4	5	2025-2026	2026-2027	2027-2028	2028-2029	2029-2030	
3.6 Diversify Funding Sources: Support key initiatives and members by seeking grants from global and international public organisations through joint projects and partnerships.	1) Number of joint research activities	Project focal point with the support by Secretariat	Record and track a list of joint research projects	The list metrics of first year of operation	At least 3 joint research projects with fundings for organisations involved by 2030	✓		✓				✓	✓	✓	✓	Increased availability of resources to conduct research relevant to regional needs and sustained collaboration
3.7 Explore Financial Models for the Network Activities: Identify financial management systems to support activities for transparency and effective resource allocation, with regular evaluations and adjustments to optimise funding strategies and secure long-term financial stability if the funding is	1) Network's financial management system once funding is received	Party appointed by the Board	Board meeting minutes	Not available (currently no funds are managed at the network level)	A financial management system					✓					✓	Central system to manage funding to achieve financial sustainability and transparency
4. Increase HTA Impact																
4.1 Monitor and Evaluate the Network's Impact: Maintain records of activities, outputs (e.g. guidelines, publications, reports, etc.), and outcomes (e.g. level of engagement, the use of outputs, etc.) of the network, and conduct evaluations as deemed necessary.	1) Number of peer-reviewed publications of projects conducted under the auspices of HTAsiaLink	Secretariat and project focal points	Record and search for published papers in the registry	Metrics of first year of operation	At least 3 peer-review publications by 2023			✓	✓			✓	✓	✓	✓	Improved the ability to track engagement of the network
	2) Number of users of HTAsiaLink products - newsletter	Secretariat	Record number of views of the Newsletter	Metrics of first year of operation	At least 50 views per Newsletter	✓			✓		✓	✓	✓	✓	✓	Improved the ability to track engagement of the network

Activity	Indicator	Responsible team	Means of verification	Baseline	Output/Target	Strategic Goals					Timeline (Year)					Outcome
						1	2	3	4	5	2025-2026	2026-2027	2027-2028	2028-2029	2029-2030	
	3) Traffic metrics of HTAsiaLink website	Editorial team	Track the number of views on materials on the network website	Metrics of first year of operation	At least 50 views on each material on the website per month	✓	✓		✓		✓	✓	✓	✓	✓	Improved the ability to track engagement of the network
	4) Develop impact stories to showcase impact of network	Secretariat and Board members	Review activities/collect data	Not available (currently not being conducted)	At least one impact story								✓			Improved the ability to track engagement of the network
4.2 Increase External Engagement: Organise platforms and activities to engage with evidence users, such as decision makers, and other non-member stakeholders to ensure alignment with their interests. Coordinate targeted pre-conference sessions and trainings, as well as share resources and collaborate through digital platforms.	1) Number of policymakers participating in HTAsiaLink events	Event organisers and Secretariat	Record participants list	First year of operation	At least 5 policymakers per event		✓		✓		✓	✓	✓	✓	✓	Increased awareness of HTA utilisation in health policy and foster future collaborations with stakeholders
	2) Number of events that involve non-member participants	Event organisers and Secretariat	Review official calendars and schedules maintained by secretariat	First year of operation	At least 1 event involved non-member participants per year	✓	✓	✓	✓			✓	✓	✓	✓	Increased awareness of HTA utilisation in health policy and foster future collaborations with stakeholders
4.3 Increase Visibility Outside the Network: Increase HTAsiaLink's visibility and impact by actively participating in external activities and events to engage with broader health policy and HTA communities.	1) Number of HTAsiaLink representatives engaged in external activities/ events	HTAsiaLink representatives	Track and report on the participated events	1 activity (RedETSA 2024)	At least 2 external events participated by HTAsiaLink representatives per year			✓	✓		✓	✓	✓	✓	✓	Increased awareness of HTA utilisation in health policy and foster future collaborations with stakeholders

ACKNOWLEDGEMENTS

This document has been prepared by Ryan Sitanggang, Lapad Pongcharoenyong and Natcha Kongkam from the Secretariat of the HTAsiaLink network, hosted by the Health Intervention and Technology Assessment Program Foundation (HITAP). The initial working team comprised Ryan Sitanggang, Francis Panlilio, Saudamini Dabak and Dr. Yot Teerawattananon. Subsequently, the team expanded to include additional members: Thuso Tlhaole, Henny Aryani, Lapad Pongcharoenyong, and Natcha Kongkam. This plan has been developed in consultation with the HTAsiaLink Board Members over the course of 2023-25, which include (in alphabetical order) Mr. Benjamin Ong, Ms. Chien Ling-Chen (Cathy), Dr. Izzuna Mudla Binti Mohamed Ghazali, Ms. Lusiana Siti Masytoh, Dr. Miyoung Choi, Dr. Sitanshu Kar, Dr. Takashi Fukuda, Dr. Wendy Babidge, and Dr. Yot Teerawattananon, who have provided continued guidance and strategic direction. We are grateful to HTAsiaLink Members whose active participation and constructive feedback during this process has contributed to the development of this plan. Additionally, we acknowledge the external support of Dr. Christian Suharlim, whose contributions in document development and technical review have strengthened this work.

The development of the strategic plan was supported by the United States Agency for International Development (USAID) through the MTaPS Program Subcontract No. MTaPS-24-100 between Management Sciences for Health (MSH) and HITAP. The contents are the responsibility of the HITAP and do not necessarily reflect the views of the funding agencies.
